

Dixon Zor

State College, PA | (267) 290-9734 | dixonzor@gmail.com | linkedin.com/in/dixon-zor | github.com/DixonzorCmpsi

SUMMARY

AI Software Engineer building production ML systems from data pipelines and model development to cloud deployment. Experienced in **applied ML**, **LLMs**, **computer vision**, and **agentic workflows** that automate operations and drive measurable business outcomes.

EDUCATION

The Pennsylvania State University <i>Master of Science in Artificial Intelligence (World Campus)</i>	University Park, PA <i>Expected May 2028</i>
The Pennsylvania State University <i>Bachelor of Science in Computer Science, College of Engineering</i>	University Park, PA <i>Graduated May 2025</i>

EXPERIENCE

AI Software Engineer <i>Radians Per Second Squared (Applied-AI consultancy)</i>	March 2026 – Present <i>State College, PA</i>
- Migrated a client from Excel to an AI-powered iOS platform, recovering \$20K+/month in uncaptured revenue - Led rollout across 10+ field and office staff, replacing spreadsheets with AI-driven daily operations - Reduced equipment downtime ~30 hrs/month with an Isolation Forest anomaly-detection pipeline - Applied PCA/SVD and K-means to prioritize the highest-risk ~10% of assets for preventive maintenance - Delivered 3 production AI apps powering agentic workflows and daily ML automation in TypeScript, Python - Built an internal client operations portal for 3+ clients, reducing management overhead by 10+ hrs/week	
AI Application Specialist <i>Penn State Nittany AI Alliance</i>	June 2025 – March 2026 <i>University Park, PA</i>
- Launched a full-stack AI platform (BAML) that coached 150+ students through a \$20K coding competition - Automated 90% of onboarding with a 3-step CV pipeline (Grounding DINO, CLIP, SAM, OpenCV) - Compressed code-review time 75% with gitingest + DSPy workflows triaging 100+ codebases to 40 - Reduced deployment setup from 2 hrs to ~20 min via an internal CLI tool for Azure/AWS - Hardened 5+ codebases/semester with OWASP, secrets scanning, RBAC, and prompt-injection reviews - Directed weekly engagements for 5+ clients including Lockheed Martin, John Deere, and Penn State OPP	
Undergraduate Research Assistant <i>The Human in Computing and Cognition Research Lab</i>	May 2023 – May 2025 <i>University Park, PA</i>
- Designed 3 Minecraft Malmo environments (Python, Java, XML) for controlled human-AI interaction studies - Conducted 25+ studies modeling cognitive biases in human-AI interaction with the ACT-R architecture - Fine-tuned a T5 model with LoRA, benchmarked vs RAG, and presented findings to 50+ at PSU Hackathon - Built 3 reproducible pandas/NumPy/scikit-learn pipelines for curation, cleaning, and model evaluation - Co-authored a peer-reviewed paper on AI ethics and chatbot development, published by the ASEE	

PROJECTS

Rad Agent <i>TypeScript, BAML, AWS EKS</i>	2026 – Present
- Cut feedback-to-code cycle time 75% by auto-routing email feedback into GitHub issues and code PRs - Engineered a multi-agent orchestration framework (TypeScript, BAML, inference APIs) on AWS EKS	
Fantasy Football Prediction AI Web-App <i>Python, XGBoost, GCP, PostgreSQL</i>	Oct 2025 – Present
- Hand-coded and trained 4 position-specific XGBoost models on curated NFL data with walk-forward splits - Automated a weekly GCP ETL pipeline retraining models on fresh results to match ESPN's fantasy predictions	

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Swift, SQL, C/C++
ML & AI: PyTorch, Hugging Face, scikit-learn, XGBoost, LoRA fine-tuning, RAG, PCA/SVD, K-means, CLIP, SAM
LLM & Agents: LangChain/LlamaIndex, BAML, DSPy, multi-agent orchestration, MCP servers, context engineering
Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, OpenTofu, Ansible, Git, n8n, Okta
Data & Frameworks: data pipelines, PostgreSQL, pgvector, MongoDB, Databricks, FastAPI, Node.js, React, Next.js
